Symposium on Liver Regeneration

September 16th 2011

University Hospital Düsseldorf, Liver Center Düsseldorf, Building 13.57

- 9:00 **Dieter Häussinger** and **Philippe Bastiaens**
Introduction
- 9:15 **Ernst Stelzer**
"Light sheet-based fluorescence microscopy (LSFM) reduces phototoxic effects and provides new means for the modern life sciences"
Goethe University Frankfurt, Germany
- 10:00 **George K. Michalopoulos**
"Liver Regeneration and Liver Cancer"
McGowan Institute for Regenerative Medicine &
University of Pittsburgh Cancer Institute, USA
- 10:45 break
- 11:15 **Jan G. Hengstler**
"Virtual liver approaches"
Leibniz-Institut für Arbeitsforschung
TU Dortmund, Germany
- 12:00 **Bryon E. Petersen**
"Hepatic Stem Cells: Ghosts in the Machine"
Wake Forest University Baptist Medical Center, USA
- 12:45 lunch
- 14:00 **Eckhard Lammert**
"Vascular development in health and disease"
Heinrich-Heine-University, Germany
- 14:45 **Roger Davis**
"Signal transduction by stress-activated MAP kinases"
University of Massachusetts Medical School, USA
- 15:30 break
- 16:00 **Jan B. Hoek**
"Systems biology approaches to the analysis of liver regeneration"
Thomas Jefferson University, USA
- 16:45 end

Registration: sfb-575@med.uni-duesseldorf.de

sponsored by DFG, SFB 575, MPG, Freunde und Förderer der HHU Düsseldorf
