

GI, the Gesellschaft für Informatik, publishes this series in order

- to make available to a broad public recent findings in informatics (i.e. computer science and information systems)
- to document conferences that are organized in cooperation with GI and
- to publish the annual GI Award dissertation.

Broken down into the fields of “Seminars”, “Proceedings”, “Monographs” and “Dissertation Award”, current topics are dealt with from the fields of research and development, teaching and further training in theory and practice. The Editorial Committee uses an intensive review process in order to ensure the high level of the contributions.

The volumes are published in German or English

The annual DFN Congress on communication networks has been held now for 17 years in succession. It is jointly organized by the Verein zur Förderung eines Deutschen Forschungsnetzes e. V. (DFN-Verein, www.dfn.de) and the Heinrich Heine University of Düsseldorf (www.uni-duesseldorf.de), ZKI (Zentren für Kommunikation und Information, www.zki.de). It is the DFN Society's central activity, promoting advanced training and information exchange for IT professionals in higher education and in major research institutions.
